“Artificial Intelligence (AI) and Machine Learning (ML) are transforming the very foundation of modern manufacturing, redefining how materials are designed, produced, and optimized. In today’s rapidly evolving technological environment, industries that embrace AI gain unprecedented advantages higher precision, faster decision-making, predictive capabilities, and significant cost and energy efficiency. This conference seeks to deepen the understanding of AI and ML applications specifically within material manufacturing and metallurgical processes, drawing insights from organizations that have already integrated these technologies. By showcasing real industrial implementations, we aim to highlight how AI is no longer optional but essential for staying relevant and competitive.

This Conference will bring together pioneering users who have successfully implemented AI, along with industry experts who are shaping the next wave of AI-driven innovation. Their experiences covering implementation journeys, challenges faced, and success stories will offer valuable guidance to industries aspiring to adopt these transformative technologies. By uniting experienced practitioners, solution providers, and new adopters, the conference aspires to accelerate AI adoption across Indian industry, strengthening its global competitiveness and preparing it for the future of intelligent manufacturing.”

## Topics

- \* Heat Treatment
- \* Forging
- \* Foundry
- \* Failure Analysis
- \* Metallography
- \* Generative AI for Mold & Die design
- \* Additive Manufacturing
- \* Metallurgical Quality Control
- \* Predictive Maintenance of Furnaces
- \* Automation
- \* Steel Making & Alloy Designing
- \* Virtual Assistance through AI
- \* Other metallurgical processes

***Call For Papers on above topics***

***last date for submitting the Abstract: 30/04/2026***
